

110 double-glass photovoltaic module

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation

Overview

What is a dual glass solar panel?

In contrast, dual-glass solar panels replace the backsheet with a second layer of tempered glass on the rear side of the module. The combined strength of using two sheets of glass makes the solar panel less prone to becoming deformed or for microcracks to form in the cells.

Should you use dual-glass solar modules for rooftops?

Robustness and reliability are critical for solar professionals looking for resilience in solutions designed to provide a greener future. Thus, using dual-glass solar PV modules for rooftops offers the opportunity to increase the energy efficiency of commercial and residential buildings. What are dual-glass solar modules?

.

Do PV modules have tempered glass?

Among the current module products on the market, only single-glass modules are equipped with tempered glass. The choice of front and shear materials is critical in determining the module's ability to withstand hail impacts. Over the past decade, the PV industry has experienced a great revolution.

Why should you choose glass in a PV module?

The choice of glass in a PV module has become a key consideration in efforts to improve durability in the face of extreme weather conditions.

Can tempered glass be used in solar modules?

The only feasible way for tempered glass to be widely used in solar modules is its application in single-glass modules. The prevailing benchmark for hail resistance, which stipulates that solar modules must be capable of withstanding impacts from hailstones up to 35mm in diameter, may fall short

in areas frequently subjected to larger hailstones.

Do dual-glass panels work for solar cell protection?

One of the reasons that dual-glass panels work well for solar cell protection is the degree of abrasion resistance. That makes dual-glass roof installations ideal for places that experience a lot of windy weather and other environmental impact.

110 double-glass photovoltaic module

2MW / 5MWh
Customizable

Double Glass 110 Cell Bifacial PV Modules 440W N-Type Topcon ...

With an annual production capacity of 3GW, we offer a wide range of modules, including PERC, N-type TOPCON, and HJT modules. At Shinefar Solar, we have a team of highly experienced ...

[Product Information](#)

Glass-Glass Modules: The Revolution for Solar Installers - Why ...

The photovoltaic industry is constantly evolving, and glass-glass modules are playing a key role in this development. What lies behind this innovative technology that is ...

[Product Information](#)

A Quantitative Comparison Between Double Glass Photovoltaic Modules

The use of half-size silicon (Si) wafer solar cells in photovoltaic (PV) modules can enhance the output power compared to full-size Si wafer solar cells. In this paper, an optimal ...

[Product Information](#)

Why Dual-Glass is the best solar panel technology for rooftops

The combined strength of using two sheets of glass makes the solar panel less prone to becoming deformed or for microcracks to form in the cells. Installing dual-glass ...

[Product Information](#)

What advantages does double glass solar photovoltaic panels ...

In addition, the glass structure of the double-glass double-sided module is more resistant to abrasion and corrosion, IP66, and the fire rating has also been upgraded from C to A of ...

[Product Information](#)

HJT Solar Panels Bifacial Double Glass 580W 575W 570W 565W ...

In order to create the ultimate cost-effective product, SunEvo Solar launched a new generation of ultra-high efficiency HJT solar modules, the Evo 6 Pro monocrystalline N-type HJT bifacial ...

[Product Information](#)

[What is the Double Glass Photovoltaic Solar Panel?](#)

Glass-glass module structures (Dual Glass or Double Glass) is a technology that uses a glass layer on the back of the modules instead of the traditional ...
