

# 120W Solar Circulation Pump

## Overview

---

What is a water circulator pump?

This water circulator pump is made of a premium stainless steel pump head and aluminum pump housing, features high power efficiency, low energy consumption, ample water flow, low noise running, and easy installation. Convenient for daily use, perfect for family water heating systems, such as remote villas, cabins, etc.

What is a recirculating hot water pump?

This circulating pump for hot water boasts a powerful motor for stable performance and low noise. The average noise level is only 25dB, enabling you to enjoy the pump without disturbing your life. The recirculating hot water pump is easy to install on appliances and industrial electric or gas water equipment.

How does vevor hot water recirculating pump work?

The VEVOR hot water recirculating pump works with different types of water heating systems. It operates with both solar and electric power systems. With the solar heating mechanism, this hot water pump uses sunlight to heat water. It operates using the electricity power in electric heating power. It is also compatible with domestic water pipelines.

How does a circulating water pump work?

The pump features a built-in high-sensitive electronic sensor, two control methods-manual start or automatic start. The pump will run continuously for manual mode, and the pump will run when the water flows when turned on automatic mode. This circulating pump for hot water boasts a powerful motor for stable performance and low noise.

How powerful is a circulator pump?

Powerful circulator pump with a max. 30 L/min water flow, max. 10 bar

pressure, and max. 36 ft head lift. Provides high performance while operating quietly at about 25dB. Features a manual/auto mode power rated at 120W for easy control. Conveniently turn on/off the pump and choose between automatic start-up/shutoff or continuous operation.

How loud is a recirculating hot water pump?

The average noise level is only 25dB, enabling you to enjoy the pump without disturbing your life. The recirculating hot water pump is easy to install on appliances and industrial electric or gas water equipment. However, you need to keep the pump shaft horizontally after installation. Max. Flow Rate: 8 Gpm / 30 L/min Max. Head Lift: 36 ft / 11 m
