## Overview

---

What are bigbattery off-grid lithium batteries made of?

BigBattery off-grid lithium battery banks are made from LiFePO4 cells, which are the best energy source because they store more energy than any other lithium or lead-acid battery. Our solar batteries are the lowest-priced energy source in the long run and are cheaper than lead-acid batteries.

How much energy does a LiFePO4 battery provide?

[Energy Independence] Empower your home with our 48V 100Ah LiFePO4 battery, delivering 5.12kWh of energy per unit. You can also link up to 32 batteries in parallel for a substantial 76.8kWh energy capacity. This robust energy storage solution is perfect for home solar systems, guaranteeing that your household's daily power demands are exceeded.

Does bigbattery use lithium ion batteries?

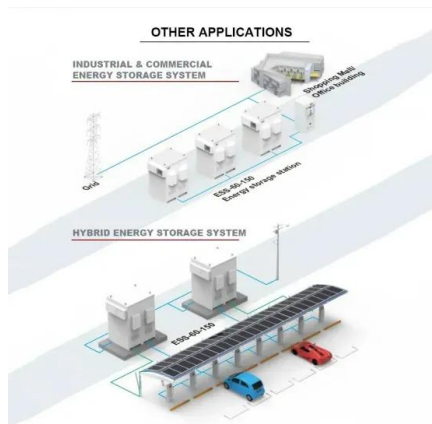

BigBattery's off-grid lithium battery systems utilize only top-tier LiFePO4 batteries for maximum energy efficiency. Our off-grid lineup includes the most affordable prices per kWh in energy storage solutions. Lithium-ion batteries can also store about 50% more energy than lead-acid batteries! Power your off-grid dream with BigBattery today!.

Can a Litio battery be scaled up?

The battery can be scaled up by connecting multiple units in parallel, supporting configurations of up to 16 units. With its slim, compact design, the Litio 10.2 is suitable for both indoor and outdoor installation (IP65).
