What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.

What are the advantages of 18650 lithium ion battery pack?

This makes it extremely economical, and provides an expected life similar to that of the device in which it is used. 18650 lithium ion battery pack has low

internal resistance and high flat voltage characteristics during strong current discharge, which ensures a wider application field. Provide long storage life with few limited conditions.

Will a 12ah lithium battery damage a lead-acid battery?

Going below 50% DOD will damage a lead-acid battery, even if they claim to be a deep discharge battery. Thus a 12Ah lithium battery would perform closer to a 48Ah lead-acid battery rating for higher discharge currents and life performance.
