

850W outdoor power supply

Overview

Is 850w a good power supply?

As I said earlier, 850W is viable for many gaming PCs with high-end components. If you want the highest performance by overclocking while staying on an 850W power supply, I recommend the Silverstone Hela 850R Platinum. This PSU has impressive performance, solid build quality, and lower junction temperatures.

Is 850w a good PSU?

For most systems, an 850W PSU is the perfect wattage for a high-end GPU like an RTX 4080 or even an RTX 4090, especially when paired with a modern CPU. It provides enough power for the components while leaving comfortable headroom for power spikes and future upgrades. What is the difference between modular and non-modular PSUs?
