

# **ASEAN containerized energy storage new energy factory**

## Overview

---

Does ASEAN need energy storage?

The ASEAN bloc has set the targets of 23% renewable energy in its Total Primary Energy Supply (TPES) and 35% renewable energy in ASEAN installed power capacity by 2025. This means that energy storage is required. Additionally, without BESS acceptance on a larger level, the needed funds won't materialise, and fewer BESS will be built.

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

Does ASEAN have a policy for promoting battery energy storage?

According to the ASEAN Centre for Energy (ACE) Policy Brief: Enabling Policies for Promoting Battery Energy Storage in ASEAN, only a few AMS have related policies. For instance, Thailand's Ministry of Energy presented its 'Energy 4.0' strategy by integrating disruptive energy technologies such as energy storage systems.

Why is ASEAN falling behind in technology implementation?

However, the Association of Southeast Asian Nations (ASEAN) bloc is falling behind in technology implementation due to a lack of awareness and policy initiatives. Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space.

Is ASEAN ready for a low-carbon transition?

Fossil fuels make up 83% of ASEAN energy mix. With energy needs expected to triple by 2050 compared to 2020 levels, the urgency for a low-carbon

transition is clear. Nine ASEAN countries have committed to reaching net zero or carbon neutrality by mid-century.

Does ASEAN have technology options to decarbonize power sector?

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This study investigates the hypothetical decarbonization pathways for ASEAN's power sector.
