

# Algeria 10MW energy storage project

## Overview

---

Which oil companies are launching a solar lab in Algeria?

The oil giants also inaugurated a solar lab to test the efficiency of different PV technologies under local irradiation conditions. Eni and Sonatrach, Algeria's national gas and oil supplier, said that they will build their new 10 MW solar project at the Bir Rebaa North (BRN) oil production complex in the Berkine basin, in southeastern Algeria.

How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

Which power plants are being built in Algeria?

Combined Cycle Power Plants: Biskra and Bellara Algeria's electricity generation capacity is set to grow with the construction of two major combined cycle power plants: Biskra and Bellara. Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW.

Will Algeria build a one-gigawatt solar energy project in 2021?

Towards this end, Algeria launched a tender for a one-gigawatt solar energy project in 2021, comprised of building five power generation sites ranging from 50 to 300 MW each.

How many solar power plants are there in Algeria?

Approximately 60 solar power plants are planned to be constructed in Algeria within the next ten years. Algeria is also part of the Desertec Industrial Initiative, which intends to use Sahara solar and wind power to provide 15 per cent of Europe's electricity needs by 2050.

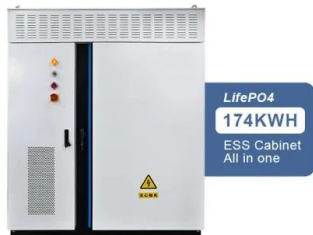

What are Algeria's key energy projects in 2025?

Algeria is advancing several key energy projects in 2025, aimed at increasing natural gas production, expanding electricity generation and enhancing renewable energy capacity.
