

Angola Communication Base Station Wind Power Construction Company

Overview

Why is energy infrastructure important in Angola?

Investment in energy infrastructure is key to economic development in the bustling city of Luanda, Angola's capital, and beyond. Photo Credit: Power Africa Modern and reliable transmission infrastructure is critical to delivering electricity from power stations to those who need it.

What is the power sector in Angola?

Revised in May 2023, this map provides a detailed view of the power sector in Angola. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, natural gas, hybrid, hydroelectricity, solar PV, wind and biomass/biogas.

Why is transmission infrastructure important in Angola?

Photo Credit: Power Africa Modern and reliable transmission infrastructure is critical to delivering electricity from power stations to those who need it. Power Africa is partnering with the African Development Bank (AfDB) and the Government of Angola to build critical transmission infrastructure in Angola.

Which countries supply power equipment to Angola?

In addition, European companies (Germany, Portugal) supply equipment to the energy sector. Portuguese, Brazilian, and Chinese construction companies generally lead in project construction. Electric power-related equipment (HTS 8411) exported to Angola in 2022, was valued at US\$ 14.8 million.

Will Angola and Namibia build a hydroelectric plant?

Namibia and Angola are set for a joint construction of the Baynes Dam hydroelectric plant with an installed capacity of 600 MW. The power production would be shared, 300 MW for each country; Power Africa is supporting the project. An additional connection in the north of Angola with

the Democratic Republic of Congo is also being considered.

What type of transmission system does Angola have?

Angola's transmission infrastructure is made up of three separate major grid systems (northern, central, and southern), in addition to isolated grids in the east. The northern grid runs 400kv and 220 kv lines, and covers Luanda, Uige, Bengo, Zaire, Malange, Kwanza Norte, and Kwanza Sul provinces.
