

# **Are photovoltaic inverters insulated in Uzbekistan**

## Overview

---

What is Uzbekistan's solar energy vision?

It outlines the sustainable energy environment solar energy could deliver and offers a timeline up to 2030. In this vision, Uzbekistan succeeds in maximising the benefits of solar energy capacity for both electricity and heat, making solar energy one of the country's major energy sources.

Can floating solar PV increase solar PV capacity in Uzbekistan?

For comparison, the area of the hydropower reservoirs are more than 15 times the size of the world's largest solar park in India, which has an installed capacity of 2.25 GW. In this regard, the potential of floating solar PV on the hydropower reservoirs is a realistic opportunity to further increase solar PV capacity in Uzbekistan.

Can variable solar power be used in Uzbekistan?

variable solar electricity benefits from the local flexibility provided by dispatchable, highly flexible hydropower, thus limiting impacts on the power system. There are currently 25 reservoirs in Uzbekistan, with a total water surface of 1 500 km<sup>2</sup>, 4 of which are hydropower reservoirs totalling 890 km<sup>2</sup> (CAWater, 2021).

What is a large-scale solar PV project in Uzbekistan?

Large-scale solar PV projects have been subject to competitive bidding processes in Uzbekistan since 2019 and an awarded project can sign a long-term contract with NEGU at a fixed tariff, as noted above. The government of Uzbekistan also aims to develop small- and medium-scale solar projects.

Who provided feedback and input to Uzbekistan's solar energy project?

Valuable comments, feedback and input were provided by Bekzod Asadov and Askar Zaitov (the Ministry of Energy of the Republic of Uzbekistan), Philippe Malbranche (the International Solar Alliance), Seung Duck Kim (the Asian

Development Bank), and Alexander Zenebe (the EU Delegation to Uzbekistan).

Should end-of-life solar panels be treated in Uzbekistan?

The treatment of end-of-life solar panels is not an urgent issue in Uzbekistan, but it could be worth considering incorporating appropriate policy measures into the regulations early on. After 2025, power system flexibility gradually becomes visible as an issue, with the increase in VRE generation.
