

Are there subsidies for energy storage projects in Malaysia

Overview

Green Investment Tax Allowance (GITA) is a government incentive available not only for solar power but also for Battery Energy Storage Systems (BESS) here in Malaysia. In this article, we explain all you need to know about how you can get the most savings out of your BESS systems with GITA. Should Malaysia adopt battery energy storage systems?

Promoting the adoption of Battery Energy Storage Systems (BESS) installations in Malaysia not only serves the interests of individuals and environmental conservation but also presents an alluring prospect for foreign investors.

Why should you invest in energy storage systems in Malaysia?

Malaysia stands at the forefront of a transformative energy revolution, ushered in by the widespread adoption of Energy Storage Systems. These systems are poised to reshape the nation's energy landscape, enhancing sustainability, grid stability, and economic viability while ensuring a reliable power supply for all.

Why should you invest in Bess in Malaysia?

BESS offers not only environmental benefits but also lucrative investment opportunities. As Malaysia works towards reducing its carbon footprint and meeting green energy targets, BESS provides a reliable, efficient solution to store and distribute green energy from intermittent renewable sources such as solar, biomass, biogas, and hydropower.

Why is Malaysia launching a Bess project?

The inaugural development of public BESS project in Malaysia is part of the Government's efforts to support the energy transition and achieve the goals of increasing the country's installed renewable energy capacity to 70% and to achieve net-zero by 2050.

What are the benefits of Bess in Malaysia?

The transformative power of BESS in Malaysia extends beyond environmental benefits. It catalyses advancements in smart grid technology and energy management systems, promoting efficient energy usage and emissions reduction.

Should foreign players participate in Bess projects in Malaysia?

Nevertheless, given that the development of BESS projects in Malaysia is still at an early stage, participation of foreign players with experiences in energy storage system projects may be crucial to support and encourage further projects of the same nature to be developed in the Malaysia energy market in the future.
