

Argentina photovoltaic power station supporting energy storage

Overview

Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

How many solar panels will Argentina install in 2024?

Argentina installed 307 MW of solar in 2024, bringing its total PV capacity to 1.67 GW by year-end, according to energy market operator Cammesa. Verano Energy, a renewables developer headquartered in Chile, has started building a 200 MW solar project in western Argentina. The installation is due for completion and connection before the end of 2025.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Will YPF Luz build a 305 MW solar project in Argentina?

YPF Luz says it is ready to start building a 305 MW solar project in Mendoza, Argentina, with an initial phase of 200 MW. Argentina's Secretariat of Energy has increased the self-consumption limit under net metering from 2 MW to 12

MW to expand the country's renewable energy capacity.

How many MW of electricity is commissioned in Buenos Aires?

A total of 46 MW was commissioned in the month in question. Argentina's AlmaGBA tender for the Buenos Aires metro area will pay a fixed \$10/MW of electricity supplied, with storage capacity bids capped at \$15,000/MW per month.
