

Australian lithium-ion battery cabinet

Overview

What are lithium battery charging cabinets?

These lithium battery charging cabinets are used to safely store and charge lithium-ion batteries in the workplace. Our cabinets are available with either 8 or 18 charging outlets and an in-built containment sump. If the temperature of lithium-ion batteries gets too high it significantly increases the chances of combustion and fires.

What are Australian made battery charging cabinets?

These Australian made battery charging cabinets are designed to safely and securely charge and store lithium-ion batteries. Constructed from heavy duty steel to protect from the dangers of lithium related fires. View your cart to calculate shipping costs FREE METRO SHIPPING for orders \$500+.

How many outlets does a lithium battery charging cabinet have?

This cabinet features 18 charging outlets and a 64L containment sump. This lithium battery charging cabinet is used to safely store and charge lithium-ion batteries in the workplace. This cabinet features 18 charging outlets and an inbuilt containment sump.

What is a battery cabinet?

A battery cabinet is a particular type of storage cabinet that reduces the risks associated with lithium-ion batteries. These innovative cabinets create a safer environment in which workplaces can charge and store their li-ion cells.

Why should you use a lithium battery charging cabinet?

If the temperature of lithium-ion batteries gets too high it significantly increases the chances of combustion and fires. These lithium battery charging cabinets offer a secure charging and storage space and will contain and protect the batteries in the event of a fire.

What is a multifile lithium battery storage cabinet?

The Multifile Lithium battery storage cabinet has multiple charging points, double-walled sheet steel construction, 40mm thick Firewall Insulation, liquid-tight spill containment sump, compliant dangerous goods signage, provision for venting, perforated adjustable shelving, and cooling fans.
