

Austria purchases stone for solar panels

Overview

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.

How many solar panels does Austria need?

With more than 3,500 MW thermal the country ranks second in the EU, only behind much larger Germany. Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.

How much solar power does Austria generate?

Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

How much wind power does Austria have?

The share of wind power rose from 7.19 TWh in 2022 to 8.26 TWh in 2023, meaning that wind power contributed more than 15% to Austria's electricity generation for the first time. The remaining energy demand is covered by fossil fuels (oil and natural gas), which is almost exclusively imported.

Which country has the largest solar power station?

In September, 2011, Austria's largest solar power station, 2 MW, was under construction in the Niedere Tauern mountain range. Austria has also a large capacity of solar heating at its disposal. With more than 3,500 MW thermal the country ranks second in the EU, only behind much larger Germany.
