

Bangladesh Energy Storage Project 2025

Overview

Can energy storage be used in Bangladesh?

Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

How much electricity does Bangladesh generate from renewable sources?

The policy aims to generate 20% of total electricity from renewable sources by 2030, equivalent to 6,145 MW, and 30% by 2041, reaching 17,470 MW. Bangladesh currently generates only 5.6% of its total electricity demand from renewable sources, with approximately 1,563 MW of grid and non-grid renewable energy capacity as of 2025.

How much electricity can Bangladesh generate from floating solar photovoltaics?

Bangladesh has immense potential to generate approximately 11,000 megawatts peak (11GWp) of electricity from floating solar photovoltaics according to International Finance Corporation screening of 323 water bodies larger than 25 acres.

Does the EU support green energy transition in Bangladesh?

The EU engagement and financial commitment in support to the green transition in Bangladesh covers different aspects of the power sector. This year, the EU has designed a comprehensive financing package of EU grant support towards Bangladesh Green Energy Transition.

What is the EU-GIZ grant for Bangladesh?

It includes an EU-GIZ Technical assistance on policy and regulatory framework, as well as a Technical Assistance and Investment Grant for

Bangladesh Renewable Energy Framework Facility, where an EU grant will be combined with a soft loan from the European Investment Bank for grid scale renewable energy power generation.

Does Bangladesh have a P2P energy trading platform?

Bangladesh already hosts successful P2P energy trading platforms, with ME SOLshare operating 48,000 PV capacity (Wp) through their SOLbazaar IoT-driven trading platform. The platform consists of SOLbox (bidirectional DC meter), SOLapp, and SOLweb components that facilitate energy trading and mobile money payments.
