

Base station 48v backup power supply

Overview

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO₄) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

Why should you choose sunwoda's telecom power supply 48V?

Modular design, support new and old batteries, mixed with lead-acid batteries
Possess a complete protection function to ensure the safe and reliable operation of the battery
The number of cycles can be as high as 6000
Sunwoda's telecom power supply 48V provides an efficient, simple and reliable power supply to a large variety of telecom sites.

What is a 48V 100Ah LiFePO₄ battery pack?

Our 48V 100Ah LiFePO₄ battery pack, designed specifically for telecom base stations, offers the following features: High Safety: Built with premium cells and an advanced BMS for stable and secure operation. Long Lifespan: Over 2,000 cycles, significantly reducing replacement and maintenance costs.

How do you protect a telecom base station?

Backup power systems in telecom base stations often operate for extended periods, making thermal management critical. Key suggestions include:
Cooling System: Install fans or heat sinks inside the battery pack to ensure efficient heat dissipation.
