

# **Become a photovoltaic energy storage manufacturer**

## Overview

---

How can I become a photovoltaic solar installer?

To become a photovoltaic solar installer, you'll likely need some level of solar pv training, depending on your current circumstances. Many renewable energy installation companies require this training and guidance to obtain their MCS accreditation.

What is a photovoltaic building company?

It aims to become a professional manufacturer of photovoltaic buildings that has a comprehensive layout in the markets of industrial and commercial buildings as well as residential buildings, responds to energy structure reforms, and promotes the development of green and zero-carbon buildings.

Where can I get a photovoltaic installer training?

To become a photovoltaic installer, you can consider training with providers like the International Brotherhood of Electrical Workers (IBEW). These training classes are designed to help you pass the test and learn the necessary skills. Union membership may be required to participate.

What is a photovoltaic Institute?

We position the institute as a platform for global photovoltaic technology exchange and cooperation that promotes the dissemination and application of photovoltaic technology worldwide, laying a solid foundation for realizing the vision - Risen Energy Grows Worldwide for Hundreds of Years.

## Become a photovoltaic energy storage manufacturer
