

Bosnia and Herzegovina communication base station inverter grid-connected new foundation EPC project

Overview

Who are the project promoters in Bosnia & Herzegovina?

Project promoters are HOPS and NOSBIH/Elektroprenos BiH. Part of project in Bosnia and Herzegovina includes upgrading of existing 220 kV lines between SS Tuzla/Gradačac (BA) and SS Đakovo (HR) to 400 kV lines. Project also includes transition of SS Gradačac on 400 kV.

When will wb17-reg-ene-01 be completed in Bosnia and Herzegovina?

Predicted year of finalization is 2024, and project realization in Bosnia and Herzegovina is planned by own funds of Elektroprenos BiH. Regional Feasibility Study for Voltage Profile Improvement (WB17-REG-ENE-01), was completed in 2020. In this study the voltage regulation devices in Bosnia and Herzegovina are optimally foreseen to be placed in:.

What is electric power generation in BiH?

Electric power generation is a key sector of economic activity in BiH. Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh.

How is electricity generated in BiH?

Electric power is primarily generated in coal-fired thermal and large-scale hydro power plants and the country is a net exporter of electrical energy. The generating capacity is about 17,000 GWh. BiH historically had a comparative advantage in electricity, particularly because of its natural hydropower resources and coal reserves.

What happened to the power system in BiH after the 1992-1995 war?

After the 1992-1995 war, the once-unified power system in BiH was divided into three vertically integrated companies split along geographic/ethnic lines.
