

**LiFePO<sub>4</sub>**  
 Lithium Battery for Energy Storage  
 12.8V 100Ah  
 Continuous Discharge Current: 20A (25°C)  
 Max. Discharge Current: 30A (5s)  
 Self-discharge: < 3% / month  
 Working Temperature: -20°C ~ 60°C  
 Storage Temperature: -30°C ~ 60°C  
**WARNING**  
 • Do not short circuit, overcharge, or over-discharge.  
 • Do not use the battery in high temperature or high humidity environments.  
 • Do not use the battery in applications where it is exposed to fire or explosion.

## Overview

---

What is a 12V 400Ah battery?

Its large 400Ah capacity makes it ideal for residential, recreational, off-grid and commercial solar applications that require clean, renewable energy solutions. With an immense 5120Wh capacity provided by premium EV Grade-A cells, one 12V 400Ah battery equals 4\* 12V 100Ah LiFePO4 batteries in parallel.

Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.

How many LiFePO4 batteries are in a 12V 400Ah battery?

With an immense 5120Wh capacity provided by premium EV Grade-A cells, one 12V 400Ah battery equals 4\* 12V 100Ah LiFePO4 batteries in parallel. You can have peace of mind knowing its energy is always smooth and safe and will last for 10 years to come.

Can foreigners invest in battery storage businesses in Brazil?

Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy).

How does LiTime 12V 100Ah TM & 230Ah LiFePO4 battery work?

LiTime 12V 100Ah TM & 230Ah LiFePO4 batteries include low-temperature charging protection which will automatically cut the battery charging off when the cell temperature is lower than 32°F, thus preventing the battery cells from damage when charging under the freezing point.

How much power does Brazil have in 2022?

Brazil added 8.2GW of distributed power generation capacity and 2.5GW of centralized power generation capacity. As of the end of 2022, photovoltaic power generation has become the second largest source of power generation in Brazil, ranking second only to hydropower in the entire installed power field, surpassing wind energy.
