

British container energy storage box company

Overview

What are containerised solutions for lithium-ion systems?

We specialise in containerised solutions for lithium-ion systems – supporting everything from EV (electrical vehicle) infrastructure to renewable energy and industrial power. Built for high-risk environments, our enclosures go beyond standard builds.

What is a Bess container?

The Eldapoint Group BESS containers range is custom-designed to provide highly efficient housings for renewables. Built to satisfy the most demanding environments and LPCB requirements, we specialise in Lithium-ion battery enclosures. Our BESS range offers three sizes to cater to diverse requirements.

Why should you choose a converted container?

Our converted containers offer unparalleled customisation and adaptability for a range of energy storage needs. The enclosures are designed for optimal performance and safety, with a key focus on: BESS Outer Enclosure Shell: The outermost layer, made of steel to provide robust physical protection against the outdoor environment.

What makes a container unique?

At its core, each container features a robust enclosure equipped with a versatile battery rack, designed for seamless customisation. This foundation enables the incorporation of additional components as per client needs.
