

# **Brunei Energy Storage Project Budget**

## Overview

---

Could solar projects be a blueprint for Brunei?

The development of solar projects, akin to those by SolarBank, may serve as a blueprint for Brunei as it builds its renewable energy capacity. By leveraging community solar projects and exploring collaborations with international entities, Brunei can accelerate its renewable energy transition.

Will Brunei focus on solar energy as a primary renewable resource?

As part of this transition, Brunei will likely focus on solar energy as a primary renewable resource, given the global trends and technological advancements in this sector. For instance, companies like SolarBank Corporation are making strides in solar power development.

Can Brunei achieve its Vision 2035 goals?

By fostering innovation and international collaboration, Brunei is well-positioned to achieve its Vision 2035 goals, paving the way for a more sustainable future. Brunei renewable energy 2035 targets 30% clean power by 2035, aligning with global sustainability goals. Discover the challenges and opportunities—read more now!.

How much energy is consumed in Brunei Darussalam?

Final Energy Consumption (historical trend: 2019, 2030, 2040, 2050) Under the LCET-CN scenario, the total final energy consumption (TFEC) for Brunei Darussalam is expected to reach 3 million tonnes of oil equivalent (Mtoe) in 2050, increasing at an average rate of 1.7% per year over 2019–2050 (Figure 2.1).

Does Brunei have a REC market?

Nascent Market with Untapped Potential: Brunei's REC market is in its early stages, but it has potential due to untapped renewable energy resources. Key Stakeholders: Various stakeholders, including government agencies, utilities,

private companies, and international organisations, play a crucial role in developing and shaping Brunei's REC market.

Does Brunei Darussalam have a low-carbon energy transition?

In the Energy Outlook and Energy-Saving Potential in East Asia 2023, Brunei Darussalam includes carbon capture and storage (CCS) technologies under its low-carbon energy transition-carbon neutral (LCET-CN) scenario in addition to an increased share of solar in the power mix by 2050.
