

Cape Verde base station communication equipment

Overview

Is Cape Verde on the cusp of a connectivity Revolution?

The picturesque archipelago of Cape Verde is on the cusp of a connectivity revolution. The introduction of satellite internet through SpaceX's Starlink is poised to redefine the very notion of access and opportunity for its island communities. From Isolation to Innovation.

Why is Cape Verde launching satellite internet?

From Isolation to Innovation Long constrained by the limitations of traditional internet infrastructures, Cape Verde's leap into satellite internet signals an end to the era of digital isolation. Starlink's advanced satellite technology deployment brings high-speed, low-latency internet, turning oceanic divides into digital bridges.

How many phone lines are there in Cape Verde?

Communications in Cape Verde. Telephones - main lines in use: 72 764 (2011) Telephones - mobile cellular: 496 900 (2011) Radio broadcast stations: AM 0, FM 22 (and 12 repeaters), shortwave 0 (2002) Television broadcast stations: 5 (and 7 repeaters) (2008) Internet Service Providers (ISPs): 4 (2008) Internet Users: 150 000 (2011).

Does Cape Verde have a good internet connection?

Cape Verde is lagging behind in the expansion of broadband internet connections. Around 74 percent of all residents have access to the internet. Around 7 percent have their own fast internet connection, which is at least faster than the former ISDN (more than 256 kbit/s).

Will satellite internet revolutionize healthcare in Cape Verde?

Moreover, satellite connectivity is set to revolutionize healthcare in Cape Verde, offering the potential for telehealth services that can save lives in remote areas. The robust and reliable nature of satellite internet means

emergency services can act swiftly, informed by real-time data that was once a distant dream.

What percentage of Cape Verde residents have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. Cape Verde is lagging behind in the expansion of broadband internet connections. Around 74 percent of all residents have access to the internet.
