

Central Africa s largest energy storage power station

Overview

Comprising four 333 MW pump turbines that generate a total of 1,332 MW of electricity, the Ingula Pumped Storage Scheme (Ingula PSS) is a pumped storage power station that encompasses two dams, designed for water capacity of 22 million cubic meters. What is the first concentrated solar power plant in South Africa?

Covering more than 2,700 acres, it is the first concentrated solar power (CSP) plant in South Africa to use parabolic trough technology. Its 1,200 parabolic assemblies heat a chemical liquid to produce energy. The project is one of the 28 renewable energy projects announced by the South African Department of Energy in 2011.

What is power doing in east & central Africa?

Power went on to announce a new \$89m initiative to expand access to cleaner, reliable energy in East and Central Africa. The goal is to mobilise \$4.7bn in public and private investment to develop 1,227MW of clean energy capacity and more than 900 miles of new transmission lines serving 50 million people.

How much power does Power Africa produce?

Power Africa has supported projects generating 6,600 MW of power to 172 million people across the continent since its launch 10 years ago.

Is Power Africa delivering more megawatts on paper?

Launched by President Barack Obama in Cape Town during his tour of the continent in the summer of 2013, Power Africa's \$7bn promise to double electricity output in five years was soon beset with criticism that it was delivering many more megawatts on paper than in people's homes.

What is the energy storage capacity of the Ingula PSS?

Straddling the border of South Africa's KwaZulu-Natal and Free State

provinces, the Ingula PSS has an energy storage capacity of 21 GWh, or 15.8 electricity generating hours.

Central Africa s largest energy storage power station

[World's largest compressed air energy storage facility ...](#)

A 300 MW compressed air energy storage (CAES) power station utilizing two underground salt caverns in central China's Hubei Province was successfully connected to the ...

[Product Information](#)

[List of power stations in South Africa](#)

Most power stations in South Africa are owned and operated by the state owned enterprise, Eskom. These plants account for 86 [6] % of all the electricity produced in South Africa and ...
