

# **Chad mobile communication wind power base station price**

## Overview

---

Does Chad have a low electricity rate?

The regulator is issuing coverage obligations fines to operators in Chad which is leading to an increase in the construction of new sites to increase population and geographic coverage. Chad has one the lowest electricity access rates in the world at just 6.4%.

Can wind power a mobile network tower?

Initial tests showed that on windy days, more renewable energy could be generated than was consumed by site operations. In the UK, Vodafone has been working with Crossflow Energy for two years to use the latter's wind turbine technology in combination with solar and battery technologies to create a self-powered mobile network tower.

How many MNOs are there in Chad?

There are three MNOs (Airtel, Maroc Telecom and Sotel) and approximately 1,500 towers in Chad, a country where just 26% of its geography has mobile coverage, 65% population coverage and mobile penetration under 50%. Tigo sold their Opco to Maroc Telecom in July 2019.

How much energy does a base station use?

A typical 3-sector base station site holding hardware from several carriers could draw anywhere between 2.5 to 10kW, but would typically sit somewhere in the middle. MTN Consulting estimates operators spend around 5-6 percent of their operating expenses, excluding depreciation and amortization, on energy costs.

How much power does a mobile tower SPS have?

The SPS unit is powered by eight kilowatt (kW) solar panels, a 16.8kW hour battery and a 26kW back-up generator, which together can deliver 12kW of continuous power. The companies said at least six more mobile tower SPS will

be deployed throughout Horizon Power's service area over the coming 24 months.
