Overview

What is a mobile 5G base station?

The mobile 5G base station, developed jointly by China Mobile Communications Group and the People's Liberation Army (PLA), can offer high-speed, secure and reliable data exchange services to at least 10,000 users within a 3km radius, according to a South China Morning Post report.

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G stations are there in China?

Stock photo of a network tower. Base stations offering high-speed fifth-generation (5G) mobile networks have now exceeded 3.19 million, the Ministry of Industry and Information Technology (MIIT) in China has said. The country now hosts 22.6 5G stations for every 10,000 residents, CGTN reported.

Which companies have been awarded a 5G contract?

Smaller contracts were also awarded to Datang Mobile Communications Equipment, Ericsson, and Nokia Shanghai Bell. China Mobile plans to operate more than 1.6 million 5G base stations this year, increase its number of cloud servers by more than 240,000 units, and add 40,000 external data center racks.

What is a 5G baseband unit?

The 5G baseband unit is responsible for NR baseband protocol processing, including the entire user plane (UP) and control plane (CP) protocol processing functions, and provides the backhaul interface (NG interface) with the core

network and the interconnection interface between base stations (Xn interface).

What is China's ambitious 5G project?

China's ambitious project is not just aimed at delivering different types of content to users but also taking its production capacities to the next level. The country has been working to incorporate 5G technology into mining, power supply, and other industrial sectors in a bid to improve efficiency and reduce costs.
