

Cities in Ireland using outdoor power

Application scenarios of energy storage battery products

Overview

Under the original 2009 Ireland had set a target of producing 16% of all its energy needs from renewable energy sources by 2020 but that has been updated by a second Renewable Energy Directive whose targets are 32% by 2030. Between 2005 and 2014 the percentage of energy from renewable energy sources grew from just 3.1% to 8.6% of total final cons.
