

Construction of new energy storage project in Southern Region

Overview

ATLANTA, May 7, 2025 / PRNewswire / -- Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. Will solar and battery storage boost Southern California's energy resilience and sustainability?

Clean Power Alliance's New Solar and Battery Storage Projects Boost Southern California's Energy Resilience and Sustainability Projects Bring a Combined 600 MW of Solar and 390 MW of Battery Storage to Power 270,000 Homes and Create an Estimated 950 Construction Jobs For immediate release: March 17, 2025.

Where is the US' largest solar & battery storage project now?

One of the US's largest solar + battery storage projects is now fully online in Mojave, California. Arevon Energy's Eland Solar-plus-Storage Project combines 758 megawatts (MWdc) of solar with 300 MW/1,200 megawatt hours of battery storage. Eland 1 reached commercial operation in December 2024, and Eland 2 recently commenced full operation.

Why is battery storage important in Southern California?

Battery storage are essential for Southern California's energy resilience and sustainability. Together, they ensure a reliable energy supply during outages or peak demand, which is specially important in a region prone to heatwaves, wildfires, and potential grid failures. Battery systems store excess solar energy for use w
