

Danish electricity emergency energy storage price

Overview

Can energy storage units be installed in the Danish power system?

Elsystemansvar A/S (subsidiary of Energinet) has asked Ea Energy Analyses to analyse the benefits and main drivers for the installation of storage units in the Danish power system. This will supplement the technology aspects in the recent Technology Catalogue on Energy Storage (DEA and Energinet, 2019).

How much does electricity cost in Denmark?

The average cost of electricity in a regular household in Denmark is approximately 3.461 DKK per kWh, whereas, for a business, the average price of electricity is 1.947 DKK per kWh. In Denmark, the price of electricity can vary from hour to hour. So, at certain times of the day, you will pay more for electricity consumption than at other times.

Where can I find the price of energy in Denmark?

In Statbank Denmark, you can find the price payable to the energy company, the price incl. network costs, the price incl. non-recoverable taxes and the price incl. paid taxes and VAT. The price of North Sea oil is also available. Go to the statbank How much do private consumers and businesses pay for electricity and natural gas?

.

Why is the electricity price in Denmark affected by primary energy sources?

As primary energy sources are traded across borders in Europe, and because it is possible to substitute between energy inputs in electricity production, the electricity price in Denmark is affected by the price of primary energy sources in Europe.

Should Denmark invest in energy storage?

Denmark has already invested in energy storage technologies, but there is

room for expansion in these areas. By investing in energy storage, Denmark could improve the reliability of its wind energy supply and reduce the need for backup power from conventional power plants. Increased collaboration with neighboring countries.

How has Russia impacted electricity prices in Denmark?

With Russia invading Ukraine, it has had a profound effect on electricity prices in Denmark. The war in Ukraine, sanctions against Russian oil, and rising oil and gas prices have led to the price of electricity in Denmark increasing by as much as 15% in the second and third quarters of 2022.
