

# **Distribution of 5G outdoor base stations in Chile**

## Overview

---

Does GIS support 5G cellular network planning in urban outdoor areas?

In this study, we developed a GIS-based optimization model to support 5G cellular network planning in urban outdoor areas. First, we employed GIS to simulate the LOS propagation of 5G signals in urban outdoor areas in a spatially explicit way.

Should 5G base stations be tripled?

To cover the same area as traditional cellular networks (2G, 3G, and 4G), the number of 5G base stations (BSs) could be tripled (Wang et al., 2014). Furthermore, Ge, Tu, Mao, Wang, and Han, (2016) suggested that to achieve seamless coverage services, the density of 5G BSs would reach 40-50 BSs/km<sup>2</sup>.

What is the location optimization approach for 5G BS?

The location optimization approach for 5G BSs aims to cover the service demand area with the minimum number of BSs or to maximize the service coverage area of a given number of BSs. To solve this typical coverage problem, an MCLP model was employed for the location optimization of 5G BSs.

What is the maximum proportion of demand points covered by Los 5G signals?

For example, when  $p = 200$  and  $d = 10$  m, the maximum proportion of demand points covered by LOS 5G signals is approximately 97.25%, which is 0.74% less than that when  $p = 200$  and  $d = 25$  m.

Why does a large area not receive Los 5G signals?

As shown in Fig. 6, when  $p = 50$ , a large area cannot receive LOS 5G signals due to building blockages. As the number of BSs deployed in the area increases, the number of dead signal areas in the study area decreases.

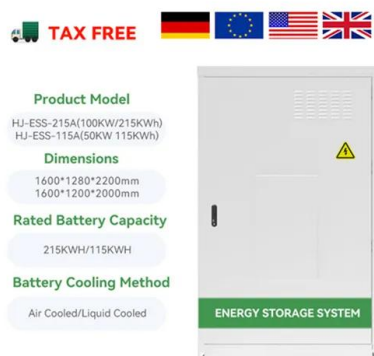

How many 5G BS will be deployed in Wuhan?

The population of the city is 11 million people. As of the end of 2018, the GDP of Wuhan had reached 212 billion US dollars. According to the development plan of the municipal government, by the end of 2020, over 20,000 5G BSs will be deployed in the downtown area of Wuhan. The study area was selected from the downtown area of Wuhan.

## Distribution of 5G outdoor base stations in Chile

---

### [Estudio: Chile liderará en la región con despliegue de ...](#)

Según Subtel, antes de iniciar la venta de servicios de quinta generación, que se desplegarán a través de la banda de 3,5 GHz, la ...
