

# **Dominica inverter control cabinet**

## Overview

---

Which frequency inverters are suitable for control cabinets?

No matter where you are in the world, our drives are your solution. We have developed the NORDAC PRO family of frequency inverters specifically for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all customer requirements thanks to a wide range of custom options.

How much power does a control cabinet inverter have?

Our inverters for control cabinet installation have a power range from 0.33 to 215 HP and can be customized with optional plug-in modules. Variable cooling solutions ensure optimum heat dissipation. Why Control Cabinet Inverters From NORD?

High Performance NORD inverters for control cabinet installation provide high precision speed control.

How much power does a Nord control cabinet inverter have?

NORD control cabinet inverters have a power range of up to 215 HP and thanks to their wide range of functionality can be perfectly adapted to many customer applications. NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive (EU) 2019/1781 (valid from 1st of July 2021).

What is a power switch & protection frequency inverter cabinet?

1. The power switch and protection frequency inverter cabinet are equipped with low-voltage MCCB which is connected to the power line, in addition to complete and disconnect the circuit, can protect the circuit and VFD short circuit and overload protection. can cut off the power during maintenance . 2.

Why should you choose a nordac pro frequency inverter?

Safety NORDAC PRO Frequency inverters have a comprehensive safety concept for all drive components. Precision Posicon positioning control not only provides high precision point-to-point positioning of the drive independent of the control unit, but also the possibility of relative positioning of endless loop axes.
