

East African Energy

Overview

Availability of sufficient, reliable and affordable energy is crucial for the functioning of the economies of the EAC Partner States. As a service and productive sector, energy plays a catalytic role in stimulating investments and higher levels of productivity.

Energy supply and access is an integral part of the EAC Development Strategy. It focuses on supply of sufficient, reliable, cost-effective and environmentally-friendly.

Development of the energy sector covering both renewable and non-renewable energy sources is aimed at facilitating the broader EAC objectives of attracting.

Co-operation in the energy sector among the EAC Partner States is governed by Article 101 of the Treaty for the Establishment of the East African Community. The.

Large-scale infrastructure projects such as the East African Crude Oil Pipeline (EACOP) and Tanzania LNG project are not only expected to drive economic growth in the region, but also trigger an oil and gas renaissance in East Africa.
