

East Asia Power Generation and Energy Storage Project

INTEGRATED DESIGN

EASY TO TRANSPORT AND INSTALL,
FLEXIBLE DEPLOYMENT

Overview

Can pumped hydro energy be used in East Asia?

. Off-river pumped hydro energy storage, along with strong interconnections and effective demand management, can support a highly renewable electricity system at a reasonable cost. The East Asia region has considerable potential for wind, solar, and pumped hydro energy resources .

What is the energy demand in East Asia & Pacific?

With rapid urbanisation and industrialisation, the East Asia and Pacific region has been on a trajectory of rapidly rising energy demand. China continues to dominate hydropower development in the East Asia and Pacific region, adding 14.4GW of new installed capacity in 2024 to reach a total of 435.95GW.

Does East Asia have renewable electricity?

renewable electricity in East Asia. 10. All regions have significantly more PHES capacities than required (blue bars). All regions except South Korea have renewable electricity (green bars). However, South Korea has as a substitute, which is only 25% more expensive. scale) for East Asia. As a guide, the amount of storage.

What is the storage potential of PHES in East Asia?

The upper respectively. The blue lines represent the hypothetical tunnel routes. The head for these two pairs is approximately 600 m. The storage potential is 150 GWh per pair with a storage time of 18 h. Image credit: Data renewable electricity in East Asia. 10. All regions have significantly more PHES capacities than required (blue bars).

Why is East Asia a good place to invest in energy?

The East Asia region has considerable potential for wind, solar, and pumped hydro energy resources . Recent technological developments further improve the performance and efficiency of the power plant where artificial intelligence

and virtual reality can be extremely helpful . .

East Asia Power Generation and Energy Storage Project

Southeast Asia Gas Report 2024

ABOUT THE ASIA GAS TRACKER The Asia Gas Tracker is an online database that identifies, maps, describes, and categorizes gas infrastructure across Asia, including gas pipelines, ...
