

# **Egypt Energy Storage Project Construction Plan**

## Overview

---

Construction on a solar and battery storage hybrid project in Egypt is set for the first half of 2025. The project will encompass a 1GW solar and 100MW (200MWh) battery storage hybrid project, the first of its kind in the North African country. Will Egypt build a solar and battery storage hybrid project?

The energy project will encompass a 1GW solar and 100MW/200MWh battery storage hybrid project, the first of its kind in Egypt. Construction on a solar and battery storage hybrid project in Egypt is set for the first half of 2025.

Does Scatec have a solar project in Egypt?

In a separate announcement, Norway's Scatec said it had signed a 25-year PPA with Egyptian Electricity Transmission Co. (EETC) for a 1 GW solar and 100 MW/200 MWh battery storage hybrid project in Egypt. "This will be the first hybrid solar and battery project in Egypt," said Scatec CEO Terje Pilskog.

Which solar projects are being built in Egypt?

The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area. The second project is a 300 MWh BESS at the site of Amea Power's 500 MW Abydos solar array, which is currently under construction. Both projects are in Egypt's Aswan governorate.

Will Egypt build a microgrid?

Earlier this year, state-owned utility Egyptian Electricity Holding Co. held an expressions-of-interest tender for the design, construction and operation of a 8.2 MW solar plant and 2 MW/4MWh battery energy storage system, which would be built at the site of an existing microgrid in western Egypt.

Does AMEA power have a solar project in Egypt?

The latest announcements bring Amea Power's total renewables capacity in Egypt to 2 GW of solar and 900 MWh of BESS. The company claims to have projects in 20 countries, with a pipeline above 6 GW and 1.6 GW currently in

operation and under or near construction.

Does Egypt have a green energy deal with Scatec?

Last year Egypt signed a memorandum of understanding (MoU) with Scatec to supply ships with green fuel in East Port Said, with investments worth around \$1.1 billion. The investment covers clean energy generation, with an annual production capacity of up to 100,000 tons of green methanol by 2027.
