

# **Energy Bureau recommends new energy storage projects**

## Overview

---

How much did the Energy Department invest in battery storage?

The U.S. Department of Energy on Friday, Sept. 22, announced a \$325 million investment in long-duration battery storage projects. (AP Photo/Sam Hodde, File) The Energy Department has announced a \$325 million investment in new battery types that can help turn solar and wind energy into 24-hour power.

Can energy storage support critical facilities during a power outage?

WASHINGTON, D.C. – The U.S. Department of Energy’s (DOE) Office of Electricity (OE) today announced three storage technologies projects that will receive up to \$5 million each to demonstrate the ability of energy storage to support critical facilities and infrastructure during a power outage or other emergency.

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. – The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE’s investment in future planning of energy storage research, development, demonstration, and deployment projects.

What is energy storage?

Energy storage encompasses an array of technologies that enable energy produced at one time, such as during daylight or windy hours, to be stored for later use. LPO can finance commercially ready projects across storage technologies, including flywheels, mechanical technologies, electrochemical technologies, thermal storage, and chemical storage.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the

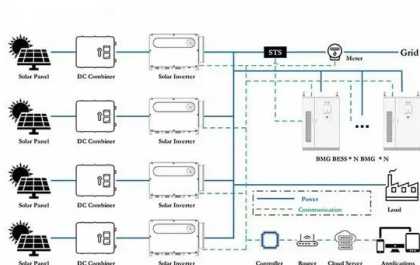

Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

How can energy storage technology improve resiliency?

This FOA supports large-scale demonstration and deployment of storage technologies that will provide resiliency to critical facilities and infrastructure. Projects will show the ability of energy storage technologies to provide dependable supply of energy as back up generation during a grid outage or other emergency event.

## Energy Bureau recommends new energy storage projects

### [New Report: Market Reforms to Harness Energy Storage and ...](#)

In New York, the ISO can make changes to better enable energy storage to efficiently match power supply with demand, saving money and improving grid stability.
