

# **Energy Storage Power Station Trial Operation Plan**

## Overview

---

How can energy storage power stations be evaluated?

For each typical application scenario, evaluation indicators reflecting energy storage characteristics will be proposed to form an evaluation system that can comprehensively evaluate the operation effects of various functions of energy storage power stations in the actual operation of the power grid.

How can energy storage power stations be improved?

Evaluating the actual operation of energy storage power stations, analyzing their advantages and disadvantages during actual operation and proposing targeted improvement measures for the shortcomings play an important role in improving the actual operation effect of energy storage (Zheng et al., 2014, Chao et al., 2024, Guanyang et al., 2023).

What is the analysis time range of battery energy storage station?

The analysis time range was from 0:00 on July 18, 2018 to 24:00 on August 16, 2018, lasting for 30 days. The operational statistics (single cycle utilization) of each power station are shown in the Table 2 below. Table 2. Actual statistics data of battery energy storage station in Zhenjiang.

What are the charging and discharging methods of energy storage station?

The two charging and discharging methods are used throughout the day, charging during two low load periods of 2:00–5:25 and 11:30–13:10; discharge during peak load periods of 10:00–11:00 and 20:30–22:20. Fig. 5. Total active power curves of energy storage station on August 10. 5.2. Data processing and indicator weight calculation.

How to evaluate energy storage power stations based on AHP - entropy weight method?

When using the TOPSIS model based on AHP - entropy weight method to evaluate energy storage power stations, the calculation steps are as follows:

1) Construct weighted normalized decision matrixes.

What are the applications of grid side energy storage power stations?

Further research directions Due to the important application value of grid side energy storage power stations in power grid frequency regulation, voltage regulation, black start, accident emergency, and other aspects, attention needs to be paid to the different characteristics of energy storage when applied to the above different situations.
