What is Delta Battery energy storage system (BESS)?

Delta's battery energy storage system (BESS) utilizes LFP battery cells and features high energy density, advanced battery management, multi-level safety protection, and a modular design. Available in both cabinet and container options, it provides a complete and reliable energy solution.

What is a rack mount battery system?

Our stackable, rack mount battery systems are designed for residential, commercial, industrial and utility scale applications. It provides reliable power storage solutions and is suitable for a variety of applications. It has a long lifespan and can be used in a wide variety of environments, making it an ideal choice for any energy storage needs.

Which energy storage solutions does Delta offer?

Delta's energy storage solutions include the All-in-One series, which integrates batteries, transformers, control systems, and switchgear into cabinet or container solutions for grid and C&I applications. The streamlined design reduces on-site construction time and complexity, while offering flexibility for future expansion.

What is smart energy storage?

Standardized Smart Energy Storage with Zero Capacity Loss All-In-One integrated design, 1.76m<sup>2</sup> footprint, saving more than 30% of floor space compared to split type Low-voltage connection for AC-side cabinet integration, ensuring zero energy loss Four-in-one Safety Design: "Predict, Prevent, Resist and Improve".

Why should you choose energy storage cabinets?

This ensures that energy storage cabinets can provide a complete solution in emergency situations such as fires. To accommodate different climates, we

provide professional recommendations based on customer usage scenarios and requirements.

What is a megawatt-hour containerized energy solution?

An advanced megawatt-hour containerized energy solution that includes multi-level fire suppression and independent temperature-controlled battery strings to ensure stable performance and maximum system life.
