

# Energy storage device working mode

## Overview

---

What are the different energy storage operating modes?

There are four different energy storage operating modes available: (1) Self Use (2) Feed In Priority (3) Backup (4) Off Grid You can turn these modes on and off by following this path: Advanced Settings > Storage Energy Set > Storage Mode Select.

How do I set up energy storage?

There are four different energy storage operating modes available: (1) Self Use (2) Feed In Priority (3) Backup (4) Off Grid You can turn these modes on and off by following this path: Advanced Settings > Storage Energy Set > Storage Mode Select > use the Up and Down buttons to cycle between the four modes and press Enter to select one.

How energy storage devices have been modernized?

Now, the world has entered the digital technologies, the energy storage devices have been modernized accordingly. The capacitor is another widely used device for storing energy as a surface charge which was developed sometimes after the batteries.

Can zenergize be used as a battery energy storage system?

Looking at two application examples helps to illustrate the full potential of battery energy storage systems such as ZenergiZe. Recent events have underlined just how important it is for companies, organizations, governments, and even whole nations to focus closely on their energy consumption – both where it comes from and how it is used.

How do I Turn Off storage mode?

You can turn these modes on and off by following this path: Advanced Settings > Storage Energy Set > Storage Mode Select > use the Up and Down buttons to cycle between the four modes and press Enter to select one. Either Self Use

or Feed In Priority mode must be turned ON, turning one on will automatically turn the other off.
