

Energy storage projects under construction in Lithuania

Overview

How will Lithuania support energy storage projects?

Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU. The programme will provide direct grants for the construction of the projects, with a target to support at least 1.2GWh of energy storage projects.

Will EU grant a battery storage project in Lithuania?

What is E-Energija doing in Lithuania?

E-energija Group has commenced construction on Lithuania's largest battery energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around 50%.

What is E-Energija project?

E-energija Group has started building Lithuania's largest battery energy storage system (BESS), known as the Vilnius BESS, with a capacity of 120MWh. Located near Vilnius, this project will be the country's first commercial battery storage facility and is expected to increase Lithuania's total storage capacity by approximately 50%.

Why should Lithuania invest in batteries?

It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the continental European electricity grid. In case of accidents, batteries will provide instantaneous electricity reserve

service in less than one second. In the future, batteries will help to integrate renewable energy sources.

How much electricity does Lithuania use?

Although the average electricity consumption in Lithuania is around 1500 megawatts, the installed capacity of both solar and wind power plants is expected to exceed 2000 megawatts in 2025, enabling surplus electricity to be stored and supplied to consumers during peak hours.”

Energy storage projects under construction in Lithuania

[200 MW electricity storage facilities](#)

The electricity storage project will guarantee security and stability of energy supply in Lithuania. It will also enable Lithuania to disconnect from the Russian controlled electricity grid and ...
