

# **Equatorial Guinea 24v home off-grid inverter**

## Overview

---

Do you need an off-grid inverter?

Without a utility grid connection, you'll need the best off-grid inverter to ensure a steady supply of electricity from your solar panels to your house. An off-grid inverter's primary function is to convert DC electricity into useable AC which can be used by our homes appliances.

What is the most powerful off-grid inverter?

The SA-12K is the most powerful off-grid inverter developed by SolArk. With 9kW, it has no problem to power a fully off-grid house. It features 2 MPPT solar charge controllers that allow up to 13kW of solar panels. This is more than enough to cover the daily needs of the average American house.

Can a 12V inverter run a 24v battery?

There are currently 3 nominal battery voltages: 12V, 24V and 48V. For example, a 12V inverter will only be compatible with a 12V battery. The higher the voltage, the higher the power abilities. With a 12V inverter you are limited to 1.5kW, with 24V around 3.5kW and with 48V you can go up to 7kW.
