

External power supply for power base station

Overview

What is a float power supply?

This power supply can be used as a base station and capable to work at various AC source conditions worldwide. The built-in float circuit keeps the backup battery in optimum status. When AC power is interrupted, the power supply can be switched by the external lead-acid battery. 1)The maximum rated output power:300W.

How do I find a good power supply?

Searching for a power supply?

Choose from our ample selection of quality DC power supplies from popular, name brand manufacturers to amply handle the load! Ordered and had them tune Gmrs antenna and working great. Highly recommend Fine, very satisfied, but the real test will be the speed of delivery. Products clearly detailed and easy to find.

How does the Power-Pac work?

The Power-Pac's highly regulated, low ripple 10 amp output powers radios and other sensitive communications equipment without causing RF or audio interference. At the same time it float charges one or two (depending on model) built in 7 amp/hour back-up batteries.
