

Finland energy storage inverter manufacturer

Overview

Where are the controllers and inverters manufactured?

With the exception of the batteries, the entire solution from controllers to inverters is manufactured in our own premises in Finland using innovative and high-quality Merus ® Technology.

What is an energy storage system?

An energy storage system enables property-specific optimization of electricity consumption and energy costs. It can also be used to participate in grid frequency reserve markets. Enico | Jupiter scales to large-scale renewable energy applications and hybrid power plants.

Is energy storage a future-proof solution?

Energy storage is no longer an option but a necessity for sustainable growth and competitiveness. Enico Oy launches a next-generation energy storage solution: Enico | Jupiter. This fully modular product family, based on European technologies, brings cost-efficiency to energy storage projects – and delivers future-proof solutions today.
