

# **French large-scale energy storage plant**

## Overview

---

Lisbon-headquartered renewable energy company TagEnergy has launched construction of France's biggest battery energy storage system (BESS). Tesla will contribute to the project also, offering market access services and its expertise in advanced storage solutions. Will Tesla build France's biggest battery energy storage system?

Lisbon-headquartered renewable energy company TagEnergy has launched construction of France's biggest battery energy storage system (BESS). Tesla will contribute to the project also, offering market access services and its expertise in advanced storage solutions.

Could Tesla Megapack power France's largest battery energy storage system?

From ESS News UK-based renewables developer Harmony Energy is looking to deliver France's largest battery energy storage system (BESS)—the Cheviré project – using Tesla Megapack technology. The 100 MW project will mark a significant milestone for the French energy system, being the nation's first large-scale two-hour battery, the developer said.

Which country has the largest battery energy storage capacity in France?

Cheviré will have the largest battery energy storage capacity in France, utilising Tesla Megapack technology, with a total power of 100 MW / 200 MWh. It will be able to charge and discharge the equivalent of 2 hours of electricity, enough to power 170,000 homes – more than the population of the city of Nantes.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

What is the first large-scale battery in France?

The 100 MW project is announced as the first large-scale, two-hour duration battery in France. The project will employ Tesla Megapack and Autobidder technology. From ESS News UK-based renewables developer Harmony Energy is looking to deliver France's largest battery energy storage system (BESS)—the Cheviré project - using Tesla Megapack technology.

Why do we need a battery energy storage system in France?

“Battery energy storage installations will be necessary throughout France to provide essential services and support the rapid evolution of the energy landscape. They will facilitate electrification, the integration of renewable energy, the security of our supply, and help control costs for both the network and the customer.
