

French photovoltaic module exports

Overview

How do indirect support policies affect photovoltaics development in France?

Indirect support policies change the regulatory environment in a way that can push PV development. The framework for developing photovoltaics policies in France falls within the long term National Low Carbon Strategy (SNBC, 2050 horizon) and the 10-year Energy Programme Decree (PPE).

What are France's photovoltaic policies?

The framework for developing photovoltaics policies in France falls within the long term National Low Carbon Strategy (SNBC, 2050 horizon) and the 10-year Energy Programme Decree (PPE). The Pluriannual Energy Programme (PPE) still sets the target for French photovoltaic capacity at 20.1 GW in 2023 and at least 35.1 GW in 2028.

Do French people have a good opinion on photovoltaics?

The RTE Ipsos study on the decision-making mechanisms of the French population in terms of energy consumption, carried out in 2023, shows that the same proportion of the sample surveyed in 2022 have a good opinion of photovoltaics (66%). However, 16% have a bad opinion (compared with 18% in 2022).

What is the target for French photovoltaic capacity in 2023 & 2028?

The Pluriannual Energy Programme (PPE) still sets the target for French photovoltaic capacity at 20.1 GW in 2023 and at least 35.1 GW in 2028. In order to achieve these targets, a schedule of calls for tenders has been adopted, with around ten calls for tenders launched each year.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCPs within the IEA and was established in 1993. The mission of the programme is to “enhance the international collaborative efforts which facilitate the role of

photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems.”

French photovoltaic module exports

Photovoltaic product exports hit record high in first 10 months

The value of photovoltaic products exported by China hit a record in the first 10 months of 2023, with industry experts saying the momentum will persist through the year, ...
