

# **Georgia Energy Storage Capacity Price**

## Overview

---

As of June 2025, the average storage system cost in Georgia is \$1580/kWh. Given a storage system size of 13 kWh, an average storage installation in Georgia ranges in cost from \$17,459 to \$23,621, with the average gross price for storage in Georgia coming in at \$20,540. Will Georgia Power offer more battery energy storage projects?

In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future. Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report.

Does Georgia Power have storage capacity at Fort Stewart?

lop, own, and operate storage capacity at Fort Stewart. Georgia Power coordinated with the Army to develop a proposal to address national security requirements related to equipment sourcing, and the Company is currently on hold pending confirmation from the Army of the compliance of the proposed plan before progre.

How will DG solar help Georgia Power customers?

has created siting challenges on the distribution grid. To continue supporting the growth of renewables that benefit Georgia Power customers, the ability to add solar charged or grid charged dispatchable storage to DG solar facilities will enhance capacity.

What are Georgia Power's seasonal capacity needs?

s details on Georgia Power's seasonal capacity needs. For the short-term, the System plans to adopt a Summer Target Reserve Margin of 19.5% and main ain a short-term Winter Target Reserve Margin of 25.5%. A significant benefit of coordinated System planning and operations, which allow companies to share resources, is that each Operating.

Is Georgia Power Company required to Ofer certain wholesale capacity blocks?

block. Commission Rule Exception to the RFP Requirement Pursuant to the Commission's Order Approving Georgia Power Company's Proposal to Offer Certain Wholesale Capacity Blocks to the Retail Jurisdiction, the Company had been required to offer.

How will Georgia Power meet its capacity needs in 2031?

valuable, dispatchable, and emissions-free resources. Through 2031, Georgia Power projects a capacity need of 9,000 MW, and the Company plans to meet that need through approved actions from 2022 IRP, 2023 IRP Update, and the incremental requests in this 2025 IRP, which include unit extensions, upgrades, hydro m
