

Greek New Energy Storage Capacity Company

Overview

How many MW of new battery storage capacity does Greece have?

The Greek authorities have awarded 300 MW of new battery storage capacity in its second energy storage tender. The 11 winning projects range in size from 8.875 MW/17.75 MWh to 49.9 MW/100 MWh.

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

Which energy projects have been selected for a four-hour storage duration?

In the latest bidding, nine projects with a four-hour storage duration have been selected for a total capacity of 188.9 MW. HELLENiQ Renewables and government-controlled Public Power Corp. (PPC) were the biggest winners, with two plants of 25 MW and one 50 MW plant, respectively.

Is a 'fever' gripping the new energy storage sector?

An investment 'fever' is gripping the new energy storage sector as the ministerial decision was published yesterday (March 14, 2025), setting the rules for installations with a total capacity of 4.7 GW in our country. So far, three auctions have supported 900 MW projects with subsidies.

Will Greece reach net zero emissions by 2050?

According to the recent National Energy and Climate Plan, Greece has enacted the climate law to reach net zero emissions by 2050. In 2024, total electricity production is estimated to be about 58 TWh, of which 35 TWh comes from renewables. By 2030, that production is estimated to reach 66 TWh, of which 54 TWh will come from renewables.
