

Grenada Electric Energy Storage System

Overview

How can Grenada achieve a sustainable future?

3.1. Intensify the diversification of generation mix and develop the potential of Grenada's indigenous energy resources (geothermal, wind, solar), increasing the share of electricity generated by renewable energy sources, in conjunction with the pledged climate mitigation efforts and the gradual phasing out of fossil fuels 3.1.a.

Does Grenada have electricity?

Electricity. Grenada has established a legal framework for the accelerated development of the supply of electricity from renewable energy, through the Electricity Act No19 of 2016 (amended in 2017) and the PURC Act No20 of 2016 (amended in 2017). The electricity subsector is currently under transformation.

Why does Grenada need a cleaner transport system?

The Government recognizes the need to shift to cleaner and more efficient transport means and fuels. The goal is for transport in Grenada to become drastically less polluting.

What role do governance and institutional reforms play in Grenada's energy sector?

Governance and institutional reforms play a central role in the development of Grenada's energy sector: affective functional institutions working in coordination are a key ingredient for the successful deployment of sustainable energy, ensuring the adequate and transparent allocation of funds to achieve the policies.

How can Grenada become less polluting?

The goal is for transport in Grenada to become drastically less polluting. A combination of measures addressing emissions, congestion, and improved

public transport will be explored to phase out fossil fuels consumption in transport, with one main solution emerging: electric vehicles.

Grenada Electric Energy Storage System

2023 Grenada Energy Report Card

Proposes the establishment of a 100% renewable energy target for both the electricity and transport sectors for 2030. The policy focuses on utility scale geothermal generation, wind and ...
