

# **Guatemala MW flywheel energy storage**

## Overview

---

A grid-scale flywheel energy storage system is able to respond to grid operator control signal in seconds and able to absorb the power fluctuation for as long as 15 minutes. Overview A flywheel-storage power system uses a for , (see ) and can be a comparatively small storage facility with a peak power of up to 20 MW. It typically is used to sta.

In , operates in a flywheel storage power plant with 200 flywheels of 25 kWh capacity and 100 kW of power. Ganged together this gives 5 MWh capacity and 20 MW of power. Th.
