Global Solar Installations Up 64 Percent So Far This Year

Even as the U.S. guts support for renewable power, the world is still pushing ahead on the shift to solar energy, with installations up 64 percent in the first half of this year. Solar is ...

[Product Information](#)

Solar energy status in the world: A comprehensive review

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential ...

[Product Information](#)

[2025 Renewable Energy Trends in Asia](#)

Aside from leading the world in solar PV and onshore wind deployment, the Asia-Pacific region, led by China, will also accelerate the deployment and further increase innovations in ...

[Product Information](#)

Five Asian countries now at the top of global solar power rankings

Within the region, China and India have seen incredible growth of their respective solar industries, leading to significant shifts in how much electricity is being generated by solar ...

[Product Information](#)

[The exponential growth of solar power will change the ...](#)

The result is that, in contrast to earlier energy sources, solar power has routinely become cheaper and will continue to do so. Other constraints do ...
