

# **Home solar integrated machine only works for two hours**

## Overview

---

Can you repair a solar inverter without professional training?

Attempting to repair a solar inverter without professional training is not recommended due to the complex and potentially dangerous nature of electrical components. However, simple tasks such as resetting the inverter, updating its firmware, or checking connections can be done safely.

How do solar lights work?

Solar lights are equipped with a light sensor, often a photoresistor, that detects the level of ambient light. This sensor acts like a switch, turning your solar lights on when it gets dark and off when it's light. During the day, the sensor keeps the solar lights off while the solar panel charges the battery.

How long do solar lights last?

The lifespan of solar lights' rechargeable batteries is typically 300-500 charges, and a decrease in light duration can indicate it's time to replace them. Damaged wiring between the solar panel and battery is a frequent cause of solar light failure, requiring inspection and repair.

How do I Activate my solar inverter?

Go to the electric service panel. Look for the circuit brake labeled PV and turn it off. Wait for 30 seconds to pass. After 30 seconds, reconnect the solar disconnect box. Activate the AC switch. Activate the inverter.

How often should a solar inverter be inspected?

Regular inspections are key to maintaining your solar inverter's performance. It's recommended to perform a visual check for any obvious issues like damage or dust buildup every few months. A more thorough inspection and cleaning by a professional should be done annually.

How do you maintain solar panels?

Trim Overhanging Foliage: If trees or bushes are casting shadows on the solar panels, trim them back to minimize shading. Regular Cleaning: Keep the solar panels clean to ensure they can effectively absorb sunlight. Dust and dirt can reduce their efficiency. Consider Seasonal Changes: Be aware that the sun's position changes with the seasons.
