

# **How many energy storage power stations are there in Bahrain**

## Overview

---

What is the energy situation in Bahrain?

Energy in Bahrain refers to the energy and electricity production, consumption, and import in the country. Bahrain is a net energy exporter. The primary energy use in Bahrain was 110 TWh and 139 TWh per million persons in 2009, and 107 TWh and 139 TWh/million people in 2008.

How many substations will be built in Bahrain?

As part of the package, fifteen (15) Substations will be constructed across the Kingdom of Bahrain.

Where does Bahrain's energy supply come from?

Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources. The country is also a major producer and exporter of oil, petroleum products and natural gas. Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources.

## How many energy storage power stations are there in Bahrain
