

How much does a 1kW solar system cost

Overview

What is the average price for a 1kW solar system in the United States?

In 2025, a 1kW solar system in the U.S. typically costs between \$2,500 and \$3,500 before any discounts, with prices averaging \$2.50 to \$3.50 per watt for home setups. This covers the panels and installation. How much does a 1kW Solar System cost?

The surplus energy can be fed back into the grid, earning you a 20% return on your investment per year based on current electricity costs. The typical cost of a 1kW solar system is around \$2,000. However, it's important to note that the prices of solar panels have come down substantially over the past 10 years.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Can a 1kW solar system save you money?

One of the major advantages of installing a 1kW solar system is the potential for long-term savings on electricity bills. On average, a 1kW solar system can save homeowners up to \$310 per year. Over the 25-year lifespan of the solar panels, this translates to a total savings of \$7,756. If playback doesn't begin shortly, try restarting your device.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
